Put your stamp on loyalty with Idealpos Engage

Powered by *Impact Data*

Idealpos Engage

A complete loyalty program for your business, from simple friction-free sign-up to ongoing engagement, our set-and-forget solution will help drive more customer visits. In fact, they will be 5 times more likely to visit.

Put your stamp on loyalty with Idealpos Engage

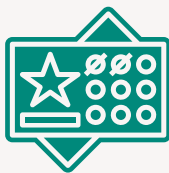

Idealpos Engage combines the powerful Idealpos loyalty tools and behavioural messages triggered by TalkBox, retention experts Impact Data's digital marketing application. Idealpos Engage has been designed to solve the four key areas of friction and frustration for businesses and their loyalty program:

Getting customer details and building a valuable database

Knowing when customers have stopped visiting

Having physical cards or stamp cards and customers losing them and missing out on rewards

Visibility of your loyalty liability

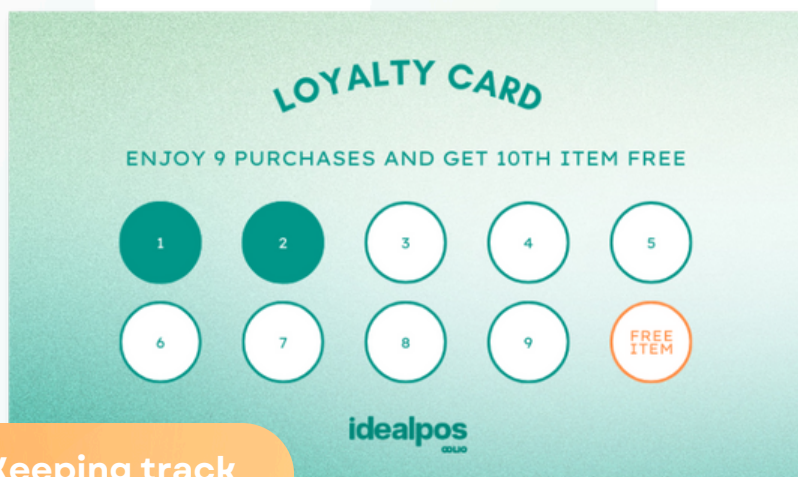

Here's how we can solve those challenges for your business:

1 Simple customer sign up via a QR code

2 We send them a digital member card to store in their Google or Apple wallet

3 They show their card with every transaction

4 We message them regularly so they keep track of rewards, encourage redemptions, celebrate key occasions like birthdays and reach out if they have stopped visiting.

Keeping track of rewards
